

## Access Course (Level 2)

### Course information

#### Why choose the Access Course (Level 2)

The ACCESS course is designed for students who need to acquire a number of level 2 qualifications in a range of established subjects including English, Maths, Science, ICT, Art and COPE. It is aimed at students that may need a number of level 2 qualifications before they can access some vocational courses or apprenticeships and that are unlikely to achieve the entry requirements with their GCSE and Btec results.

#### Course Outline:

The ACCESS course is designed to be taken alone and not in conjunction with any other subjects and the timetable includes the following subjects: English, Maths, Science, ICT, Art and COPE.

To complement the skills based approach to the course all ACCESS students are expected to attend one full day of work experience each week in a placement chosen by the student with a dedicated member of staff.

#### Resources and facilities:

Students will have a dedicated member of staff for each subject on their timetable as well as regular monitoring by staff responsible for work experience.

#### Careers and progression:

Students who complete the ACCESS course will be qualified for a number of vocational courses and apprenticeships in various fields, including engineering and health and social care. Students will have guidance in their options for progression during the course.

## **Enquiries:**
